WORK & LEADERSHIP EXPERIENCE

Wilmette Kenilworth Chamber of Commerce, Wilmette, IL

June 2026 – Sep 2026

Forward Deployed Engineer Intern

- Led end-to-end development of WKCC Perks, a native SwiftUI iOS application, collaborating directly with Chamber stakeholders to translate member-engagement and business-directory requirements into mobile product features.
- Designed the application architecture and integrated ChamberMaster/GrowthZone APIs to connect business-directory and member-offer data to an accessible user experience supporting 200+ local businesses.
- Partnered with stakeholders to validate requirements, prioritize functionality, troubleshoot integration issues, and iterate on user-facing features based on organizational needs.
- Scoped a phased Member Success Hub with Chamber leadership to track tier-based benefit entitlements, fulfillment status, staff follow-ups, member requests, and lead/referral workflows across WordPress, a shared backend, and the WKCC Perks app.
- Defined source-of-truth boundaries, role-based access rules, member-visible versus staff-only data, and human-approval controls for benefit updates, referral management, and future AI-assisted communication workflows

Main Event, Tempe, AZ

October 2024 – May 2025

Technician

- Provided first-line technical troubleshooting across 100+ computer systems, arcade systems, and connected devices in a high-volume customer environment.
- Diagnosed and resolved hardware and software issues, performed preventive maintenance, and restored customer-facing systems to minimize operational downtime.
- Applied systematic troubleshooting and root-cause analysis across diverse technology environments, escalating complex issues when appropriate and communicating technical status to operational stakeholders.

PROJECT EXPERIENCE

elovatesr.com

Aug 2026 – Present

TypeScript, Next.js, React, Supabase, PostgreSQL, Deno, TailwindCSS, Google Cloud Vision, Git, Netlify

- Built and deployed a full-stack, API-integrated rank-tracking platform using TypeScript, Next.js, React, Supabase, PostgreSQL, Deno, Tailwind CSS, and Google Cloud Vision OCR.
- Designed a data-ingestion workflow that processes user-uploaded match screenshots through Google Cloud Vision and transforms extracted Skill Rating data into structured records for user history, progression calculations, and leaderboard features.
- Implemented Discord OAuth, magic-link authentication, cloud-synced user data, and user-centered onboarding/profile experiences across the application.

[borgwithus](https://borgwithus.com)

July 2024 – Present

TypeScript, React, Vite, Supabase, TailwindCSS, Git, Hetzner

- Built an LLM-powered full-stack social platform using TypeScript, React, Supabase, Tailwind CSS, and a Hetzner-hosted Ollama model, integrating prompt-engineered inference into a user-facing generation workflow.
- Developed server-side AI-generation workflows using Supabase Edge Functions; implemented per-user rate limits, feedback capture, user-submission review, and administrative monitoring to support controlled operation of AI-enabled features.
- Owned architecture, frontend and backend development, authentication, application data, model integration, deployment, and ongoing iteration.

EDUCATION

Arizona State University, Ira A. Fulton Schools of Engineering, Tempe, AZ

Aug 2022 – May 2026

Bachelor of Science in Engineering

Major: Computer Science

Relevant Coursework: Networks & Computer Systems, Data Structures & Algorithms, Object-Oriented Programming, Calculus I & II, Computer Hardware & Organization, Web Development, Software Engineering, Cybersecurity, Human Computer Interaction, Software Design, Software QA and Testing (CI/CD)

SKILLS

Programming Languages: JavaScript, TypeScript, Java, C++, Python, SQL, Swift, SwiftUI

Web Development: ReactJS, Node.js, HTML, CSS, TailwindCSS, REST APIs

Tools & Technologies: Git, GitHub CI/CD, Figma, Adobe Creative Suite, Windows, Mac, Linux
